

Why Choose **BAILEY**[®] VALLEY FLASHING?

BAILEY METAL PRODUCTS offers Valley Flashings with both a hem and a hem rib option in addition to our standard valley. These features provide Roofers with a higher quality product ***at the same price*** as a standard valley.

HEM:

A hemmed edge is one that has been folded over for added safety

- Reduces the possibility of injury (such as cuts or slices to fingers)
- Adds strength to outer edges of panel

RIBS:

Ribs are raised stiffening ridges along the outer edges of the valley

- Adds strength and rigidity to the panel
- Reduces the chances of folds, creases or bends occurring
- Easier to carry and handle on the roof

W-VALLEY:

A raised ridge running the length of the valley

- Additional strength and rigidity to the panel

Dimensions Available:
