

READY PRODUCTS

Hand-Bendable Curved Framing Profiles

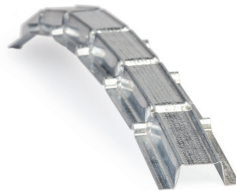

Choose Ready Products when you:

- Need a same day curved framing solution
- Cannot lock down the radius
- Would like easy to use framing profiles

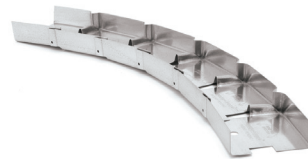

Framing Contractors really appreciate how much easier and faster it is to build curved surfaces with Ready Products. They've proven time after time to be the most convenient and simple, flexible solutions for any curved shape. Ready Products are easy to form, install quickly and greatly reduce your labor costs.

READY PRODUCTS

Easy to Shape
Versatile
Big Time Saver

READY-HAT®

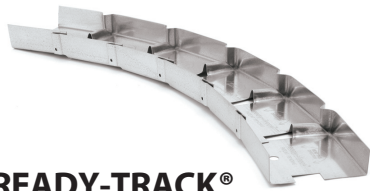

READY-TRACK®

READY-ANGLE®

READY-TRACK®

Hand-bendable Ready-Track® framing is the fast and dependable way to frame a curved wall while you're on the job site. Sold in straight sections, Ready-Track® flexible framing is easy to shape, so it installs rapidly, and greatly reduces labor costs.

APPLICATIONS – Ideal for curved walls, soffits, clouds, compound radiused top and bottom track for curved stairwells, or when you need material curved the hard way along the flange.

25 GAUGE SIZES: 2½", 3½", 3⅝"

20 GAUGE SIZES: 4", 5½", 6"

PROFILES AVAILABLE – 8' or 10' lengths

PRODUCT SPECIFICATIONS

ASTM A653 galvanized steel 25 & 20 gauge
ASTM A653 coating designation G-60
Minimum radii range from 10"–20"

READY-ANGLE®

Ready-Angle® framing adapts to almost any shape and curves in multiple directions so it's easy to form challenging compound curves and s-bends. Use two pieces of Ready-Angle® framing to create curved track for steel and wood studs, or form arches of any depth quickly.

APPLICATIONS – Ideal for s-shapes, spirals, sweeps, walls or soffits of varying thickness, or virtually any free-form shape.

STANDARD SIZES – 1½" x 1½"

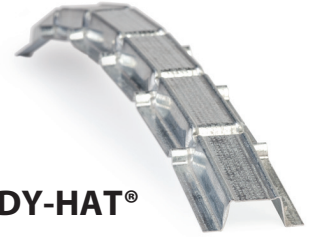

PROFILES AVAILABLE – 8' or 10' lengths

PRODUCT SPECIFICATIONS

ASTM A653 galvanized steel 20 gauge
ASTM A653 coating designation G-60
Minimum radii range from 10"–20"

READY-HAT®

Versatile, low profile, and economical, form Ready-Hat® flexible furring channel by hand on the job-site to the exact convex or concave shape needed. Secure it to concrete walls, wood or metal. More than your average hat channel, Ready-Hat® furring makes framing curved surfaces fast and easy.

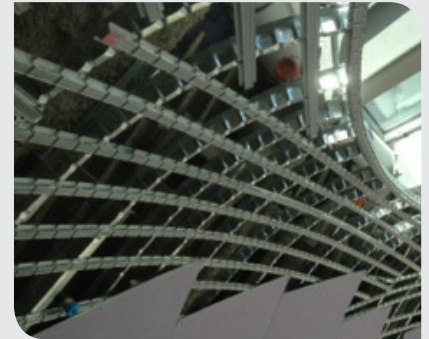

APPLICATIONS – Ideal for furring on curved walls or to create coves, barrel vaults, groin vaults, soffits and serpentine ceilings, and to wrap columns, or as cross-framing to eliminate drywall butt joints.

STANDARD SIZES – 7/8"

PROFILES AVAILABLE – 10' lengths

PRODUCT SPECIFICATIONS

ASTM A653 galvanized steel 20 gauge
ASTM A653 coating designation G-60
Minimum radii range from 10"–20"
